

# GREEN EGGS & SAND Workshop at Chincoteague NWR!

## Wednesday, June 22, 2005

Looking to infuse a global biodiversity and current real-life natural resource management challenge into your classroom?

Join refuge environmental education specialist Alison Penn, along with members of the GE&S project team and other experts, to learn more about this amazing story.

Participate in this day-long, hands-on workshop and receive a wealth of materials developed for educating middle and secondary students about the linkages between crabs, shorebirds and humans.

Join us on the beach to view spawning horseshoe crabs in the morning! The rest of the workshop takes place in and around the state-of-the-art Herbert H. Bateman Educational Center. **Lunch will be provided!**

### By attending this workshop you will:

**Learn from the experts!** The workshop features scientists and educators presenting the latest information on the crabs, birds and management controversy.

**Join the experts!** Start the day off on the beach to observe spawning horseshoe crabs. Bring boots and binoculars!

**Become an expert!** Receive a wealth of lesson plan and educational video materials developed with the help of master teachers and keyed to the national education standards. Take back ideas and resources to make these issues come alive for your students!
